6TH GRADE SCIENCE • PROJECT DETAILS

Volcano Project

Everything you need to know to build your volcano!

The Rules

8" TALL

At Least 8 Inches Tall

Your volcano must measure at least 8 inches from bottom to top.

Just Build the Volcano

Your job is the structure only. Eruption supplies will be provided in class!

How to Make Your Volcano

1

Bottle in the Middle

Stand a plastic bottle in the center. This is where the eruption will happen!

2

Add Cardboard

Surround the bottle with cardboard to make the mountain shape.

3

Paper Strips

Dip strips of paper in a paste and lay them over the cardboard.

Glue + Water

or Flour + Water

4

Paint & Color

Paint or color your volcano to make it look realistic!

💡 Keep the bottle opening uncovered!

💡 Let the paper dry before painting.

NOV 4

Due Wednesday, November 4

Bring your finished volcano to class, and we'll make it erupt together!
