Living Wisely Online — Quiz Review Sheet

AI Use • Online & Texting Behavior • Typing • 7th Grade

Study this sheet before the quiz. Everything on the quiz comes from what is on these pages!

Part A — Key Words to Know

Know what each word means. These will be on the matching section.

Netiquette	Using good manners and polite rules when talking with people online.
Cyberbullying	Using technology to hurt, threaten, or embarrass someone again and again.
Phishing	A fake message or website that tries to trick you into giving away private information.
Plagiarism	Copying someone else's words or work and calling it your own.
Personal information	Private facts about you, like your address, phone number, and passwords.
Privacy settings	Controls that decide who can see your posts and information.
AI chatbot	A computer program that answers questions and creates writing or pictures.
Fact-checking	Checking a claim with trustworthy sources to make sure it is true.
Digital footprint	The trail of information you leave behind online (posts, pictures, comments, searches).
Hallucination	When an AI makes up a fact that sounds true but is false.
Deepfake	A fake picture, video, or voice made with AI to look or sound like a real person.

Part B — THINK Before You Post or Text

Ask yourself these five questions every time.

True? **H**elpful? **I**nspiring? **N**ecessary? **K**ind?

Part C — Staying Safe Online

- **Never share personal information** (home address, phone number, passwords, school) online or with an AI chatbot.
- **Strong passwords** are long and mix letters, numbers, and symbols (like Blue-Tiger!47river). Weak: password123, 111111, your name.
- **Never share your password,** not even with your best friend.
- **Strangers online** are not always who they say they are. If someone you don't know asks where you live or go to school, don't answer, block them, and tell a parent.
- **Posts last forever.** Even if you delete something, someone may have already taken a screenshot.
- **Your digital footprint matters.** Schools and future employers may look at what you have posted. Keep it positive: THINK first, use privacy settings, and post only kind, true things.
- **Ask permission** before posting a photo of someone else.

Part D — Being Kind Online & Texting

- **Treat people online the same way** you would treat them face-to-face.
- **ALL CAPS** in a text looks like you are shouting.
- **Texts are easy to misunderstand** because the reader can't hear your tone of voice or see your face. If a friend sends a short text like "k.", don't assume the worst. Kindly ask, "Hey, is everything okay?" or talk in person.

- **If you see cyberbullying,** don't join in or share it. Be kind to the person being hurt and tell a trusted adult. Telling an adult is NOT tattling; it helps keep people safe.
- **If someone sends you an embarrassing photo of someone else,** don't share it. Delete it and tell a trusted adult.
- **No texting during class,** even if the teacher doesn't see you.
- **Ephesians 4:29** says, "Let no corrupt communication proceed out of your mouth, but that which is good to the use of edifying." Online, this means only posting and texting words that build others up: no gossip, insults, or bad language.

Part E — Using AI Wisely

- **AI can make mistakes.** It is NOT always right. When it makes up a false fact, that is called a hallucination.
- **Fact-check AI** by looking it up in a trustworthy source (textbook, encyclopedia, reliable website), comparing more than one source, or asking a teacher or parent.
- **Honest AI use** (with your teacher's permission): asking AI to explain something you don't understand, then doing the work yourself.
- **Dishonest AI use:** having AI write your essay, copying AI answers onto a test, or turning in AI work as if you wrote it. That is cheating.
- **Deepfakes** are fake pictures, videos, or voices made by AI, so don't believe everything you see online.

Part F — Practice the Short Answers

The quiz will ask questions like these. Read the sample answers and be ready to explain in your own words.

Q: What are TWO ways to check if something an AI told you is true?

A: Look it up in a trustworthy source like a textbook or encyclopedia, and compare it with another source or ask a teacher or parent.

Q: What is a digital footprint? How can you keep yours positive?

A: It is the trail of information you leave behind online. You can keep it positive by THINKing before you post and only sharing kind, true things.

Q: Why is tone hard to read in a text? How should you respond?

A: The reader can't hear your voice or see your face. Don't assume the worst; kindly ask if everything is okay.

Q: What is ONE honest and ONE dishonest way to use AI for homework?

A: Honest: asking AI to explain a hard idea, then doing the work yourself. Dishonest: having AI write it and turning it in as your own.

Q: How can you obey Ephesians 4:29 online?

A: Only post and text words that are good and build others up. Don't gossip, insult, or share mean posts.
